Education

Moreno Valley College — Moreno Valley, CA
Associate of Science in IT Cybersecurity — *Expected June 2027*

University of California, Riverside — Riverside, CA
Bachelor of Science in Computer Science — *2024*

Experience

Freelance Mobile/PC Technician — San Jacinto, CA
Self-employed — *February 2021 - Present*

- Troubleshoot and repair hardware, software, and network issues for desktops, laptops, mobile devices, and printers
- Perform OS installs, upgrades, data backup/recovery, and malware removal
- Replace components and optimize system performance
- Configure home networks, routers, and Wi-Fi for improved connectivity and security
- Provide clear technical support to non-technical users and manage scheduling, diagnostics, and customer payments

Projects

SIEM Log Monitoring and Threat Detection | *Python, Ubuntu Linux OS, ELK Stack*

- Deployed the Elastic Stack (Elasticsearch, Logstash, Kibana, Filebeat) on an Ubuntu Linux VM using VirtualBox to build a custom SIEM solution
- Ingested and normalized system logs and CSV-based event data into Elasticsearch for structured analysis and correlation
- Configured Logstash pipelines and created Kibana dashboards to detect authentication failures, malware activity, and high-priority alerts
- Strengthened incident visibility by developing queries and visualizations to identify security trends and suspicious activity

Crime Database System | *Python, SQL, MySQL, Node.js, PySpark, Hadoop*

- Preprocessed 22 million records of police crimes across five major cities (LA, Chicago, NYC, Austin, Philly) using Python scripts in PySpark, and stored the data in MySQL for efficient management
- Leveraged Node.js to retrieve and streamline the integration of large-scale datasets from MySQL, ensuring smooth data delivery and support for front-end development

Simon Says | *C*

- Simon Says esque game using ATmega328P microcontroller (Arduino UNO) where light patterns are displayed on four LEDs in a cross patern
- Used bit manipulation to initialize and control components such as an EEPROM, Joystick, LCD screen, Buzzer, and LEDs
- User uses joystick to enter the pattern (choices are UP, LEFT, RIGHT, DOWN)
- LCD screen displays game state
- When powered off, EEPROM stores score data (highscore)

UCR Chatroom | *JavaScript, HTML, CSS, Node.js, MongoDB, Git, Github*

- Developed a chat system using MongoDB to securely store user login credentials and efficiently manage chat data, using real-time communication and authentication processes within the application
- Integrated Google Login to provide users with a seamless and secure alternative login method, enhancing the overall user experience

Skills

Spoken Languages: Fluent in Spanish and English
Operating Systems: Windows, Linux, macOS, iOS, Android
Programming Languages: C/C++, Java, Python, SQL, JavaScript, LC-3
Other Technologies and Tools: Wireshark, Nmap, ELK Stack, VirtualBox, ProDiscover, Autopsy, GParted, HTML, CSS, Arduino, MySQL, Git/Github, Microsoft Office (Word, Excel, PowerPoint, Outlook)
